

## **BENTLEY S2 CONTINENTAL**

**Year : 1962**

This is one of 71 S2 Mulliner coupes produced. This example has been maintained to a high standard and is in excellent condition. This is one of the last classic Continentals and performs well with modern driving conditions making it a true pleasure to drive. When we purchased this car we found it to be in very good condition with the previous owner maintaining it to a high standard over the last fifteen years. With these models appreciating we felt that this car would benefit from a detailed restoration to make it one of the best examples available. We have just completed the restoration of the chassis and chassis components and engine etc, renewing rubber service components such as power steering hoses, radiator hoses, seals and gaskets, we have renewed the exhaust system and overhauled the braking system. All components have been repainted, engine bay plating has been re cadmium plated and detailed to show standards. Technically we know this to be one of the best with every aspect attended to in the highest standards, in fact this work was used as an example to enter a competition by two of our technicians who have just received an award from the Master of the Coach Makers and Coach Harness Makers Company and the Sir Henry Royce Memorial Foundation.

This will create the finest example of this classic Bentley Continental that will perform well with modern driving conditions making this a true pleasure to drive. Your enquiries for this car are warmly welcome.
